Note: James

Please see the attached letter. Tetra Tech can easily supply the letter describing proposed site activities and can provide the insurance documents. Regarding the hold harmless clause, however, I would like your involvement in. Is this something EPA is willing to provide? Please, contact me to discuss and I will proceed with the letter and insurance as necessary after we have talked.

Thank You  
Steve

Re On site inspection Rolling Hills Bank & Trust

Dear Mr Holmes

I wanted to inform you that it is our wishes as well as yours to identify and clean up any environmental hazards. In order for us to sign the consent, I would like a letter from your company stating what you informed me of the other day. It will need to contain a hold harmless clause so that no cost or liabilities will now or in the future occur to the bank, as we were in no way involved with any contamination of the property. Also, please provide us with a certificate of insurance showing that your company has general liability coverage as well as other coverage insuring that the bank will be protected against any damages arising from your testing.

Sincerely,

Charles N Edwards  
President
